A ReactJS developer with hands on real time projects, my interest is in the MERN stack. I build efficient, attractive, user-friendly, responsive user interfaces with HTML, CSS, Javascript, and React.js, and highly optimized, scalable web applications with the MERN stack. Reusable and clean code, teamwork, the ability to work under pressure, humbleness, and patience are my specialties. I am looking forward to a position as a front-end developer where I can utilize my skills and expand my abilities.
